

§915.20

lands having land uses similar to the approved postmining land uses of areas disturbed by mining in Iowa.

(c) By May 25, 2000, Iowa must either remove section IV, part G, which contains the requirements and methods for control area climatic adjustments to the prime farmland average yields provided in the County Soil Map Unit Yield Data tables, from its April 1999 revegetation success guidelines or submit for OSM approval evidence that the U.S. Natural Resources Conservation Service concurs with this provision.

(d) By May 25, 2000, Iowa must amend its revegetation success guidelines at:

(1) Section IV, part E by either adding planting arrangement provisions for recreational, wildlife, and forested lands and obtaining program-wide concurrence for the provisions from the State agencies responsible for the administration of forestry and wildlife programs or adding a provision that requires permit-specific concurrence for minimum planting arrangements from the State agencies responsible for the administration of forestry and wildlife programs.

(2) Section IV, part E by either obtaining program-wide concurrence for its minimum stocking provisions or adding a provision that requires permit-specific concurrence for minimum stocking from the State agencies responsible for the administration of forestry and wildlife programs.

(e) By May 25, 2000, Iowa must add a provision to section V, Part A.2 of its revegetation success guidelines that specifies the standard method that permittees are to use for obtaining the dry weight of test plot grain samples.
